PROJECTS

FriendZone

Video and board game players create meet up times to play games across Austin, TX

- Led our team as Project Manager and assigned team members to work on specific features.
- Maintained our repository on GitHub and branches using Git.
- Created user and admin logins using Entity Framework.
- Designed controllers and models with team.
- Held a Scrum meeting before each coding session with team where strategies and goals were outlined.
- Deployed via Microsoft Azure

Spa Appointments

Clients can schedule an appointment with a specific employee and management can edit employees and appointments.

- Implemented the Repository Pattern to improve readability of the controllers.
- Previously deployed site using Microsoft Azure.
- Developed unit tests using Moq.
